

# SAP OVERVIEW

## SAP PRACTICE AREA

Rural Sourcing's SAP practice provides a wide range of technical and functional services delivered by analysts and developers with deep industry and system expertise. We offer a competitive alternative to offshore for remote functional and technical development and support. We have a proven track record of success that lowers the cost of implementations and increases ROI. At RSI, we provide:

- Technical and Functional Support, and Project Management
- Custom development, integration, upgrades, post-implementation support, and implementation staff augmentation
- Expertise in ECC, AIE, HANA, BW front and back-end, Mobile, CRM, Basis
- Decades of combined industry experience from certified resources
- Registered SAP partner

## BUSINESS INTELLIGENCE

Our BI/BW Team delivers a range of services that are tailored to your specific outsourcing needs from routine daily monitoring to the complete implementation of the SAP BW software and systems. We provide guidance and recommended best practice solutions for your systems with regards to development, scheduling, broadcasting, installation, and deployment.

## ABAP DEVELOPMENT

Our team of expert ABAP developers are SAP certified. Their knowledge expands across all Technologies offered by SAP in the NetWeaver Platform including implementation skills for migration, reporting, workflow, enhancement of existing functionality, custom development and 3rd party application integrations.

## BASIS

Our team of SAP Basis & Security administrators delivers a range of services that are tailored to your specific outsourcing needs from routine daily monitoring to the complete management of the SAP software and systems. In addition, the RSI Basis team can provide SAP Basis team management, SAP Basis Project management, SAP Basis Team Lead service and SAP Basis Training.

## FUNCTIONAL

Our SAP functional advisors combine an extensive proficiency with SAP modules and configuration with a wealth of business and industry experience and expertise. We provide a proven capability to lower the cost of implementations with increase productivity, and increase ROI with skilled post-implementation functional support. We also provide first, second, and third tier support services.
